

MedTec Medizintechnik awarded as TOP 100 Top-Innovator for the third time

MedTec Medizintechnik GmbH remains the title holder and will be awarded with the TOP 100 quality mark for the third time in 2018. This is an extraordinary achievement. Following the awarding in 2014 and 2016, the Wetzlar-based company was able to convince the jury with its innovations once again. Sales & Marketing Director Guido Finkes and Marketing & Press Consultant Caroline Ebinger were presented with the coveted award by Ranga Yogeshwar on behalf of the entire company.

TOP 100 - top innovator

On June 29, 2018 the time had come again: MedTec Medizintechnik GmbH from Wetzlar was awarded with the TOP 100 award for the third time by award mentor Ranga Yogeshwar at the ceremony in Ludwigsburg that is part of the 5th German SME Summit. Innovation leader of German small and medium-sized enterprises Already for the 25th time, the

TOP 100 competition has crowned the most innovative companies in the German SME sector. This year, MedTec Medizintechnik GmbH, the manufacturer and developer of MBST magnetic resonance therapy, is once again one of these innovation leaders. This is the third time that MedTec has made the leap into this innovation elite. In an independent selection process, the company could make an impression with its innovative success. Thanks to its own research and feedback from medical users and patients, MedTec is constantly discovering new fields of action for the MBST therapy system. New therapeutic devices are constantly being developed and the range of indications is growing.

MBST - Innovative medical technology for non-invasive stimulation of regenerative processes

MBST magnetic resonance therapy is a therapeutic development of the technology known from magnetic resonance imaging (MRI). However, MBST is not used for diagnostic purposes, but aims to use the effect of magnetic resonance to biophysically stimulate specific cells. Scientific data show that repair or regeneration processes can be triggered in the tissues treated in this way. In many cases, surgical interventions can be avoided and pain can be reduced up to painlessness. As a result, many patients report an improved quality of life. MBST therapy is currently successfully used in the treatment of degenerative diseases of the musculoskeletal system such as osteoarthritis, osteoporosis, injuries to muscles, ligaments and tendons, bone metabolic disorders and wound healing problems - both preventively, postsurgically and accompanying rehabilitation.

Axel Muntermann, founder and CEO of MedTec Medizintechnik GmbH: „We are proud that not only we are once again among the TOP 100 innovators in Germany, but also that we have managed to further improve our innovation and progress record of recent years. We will do everything we can to continue in this way: for the doctors and patients who rely on our unique and innovative medical technology“.

About MedTec Medizintechnik GmbH

Since 20 years MedTec Medizintechnik GmbH stands for innovation and quality in medical technology. The company, which has already been awarded several times with the TOP innovator award of German medium-sized companies, is also one of the „FOCUS growth champions“ in Germany. The aim of the Wetzlar-based company is to sustainably improve people’s health. To this end, the company develops top-quality high-tech medical technology for human, veterinary and aesthetic medicine. With the scientifically confirmed and patented MBST magnetic resonance therapy system, MedTec is the world market leader in the field of therapeutically used magnetic resonance technology. In addition to the causal approach for degenerative diseases of the musculoskeletal system, the MBST therapy system also pursues a regenerative approach for other indications. Study data show that MBST therapy can be used for anti-inflammatory, analgesic and regenerative purposes, including postsurgically and accompanying rehabilitation. Among other things, the aim is to actively accelerate healing processes and minimize downtimes and recurrences. Doctors, medical care centres, clinics and universities now rely on the MBST therapy system - not only in Germany and Europe, but worldwide. In Germany alone, more than 100,000 therapy hours are performed annually with the MBST magnetic resonance technology.
